PROFESSIONAL SUMMARY

Quality Assurance Engineer with 5 years of experience in software testing across SaaS, web, mobile, enterprise, and digital learning platforms. Skilled in functional, regression, integration, UAT, API, performance, security, and usability testing, with strong expertise in requirements analysis, test strategy, defect management, and release management. Strong background in Agile/Scrum environments, cross-functional collaboration, QA coordination, team mentoring, and supporting successful project delivery throughout the SDLC

WORK EXPERIENCE

Innovate Tech, New Baneshwor

January 2022 – Present

Project Manager

July 2025 – Present

- Led project planning, requirement gathering, sprint planning, task coordination, and delivery across Product, Development, QA, and other cross-functional teams.
- Conducted regular client and stakeholder meetings to discuss requirements, project progress, priorities, risks, dependencies, blockers, and upcoming deliverables.
- Gathered and analyzed business requirements and translated them into clear user stories, acceptance criteria, functional requirements, and project documentation.
- Managed project requirements, tasks, bugs, dependencies, and production issues using GitLab while ensuring timely follow-up and resolution.
- Coordinated cross-functional teams to manage priorities, resolve blockers, and ensure features were delivered according to agreed timelines.
- Monitored project timelines, milestones, deliverables, and overall progress, communicating project status, risks, and priorities to relevant stakeholders.

Senior Software QA Engineer

July 2024 – Present

- Led QA activities across multiple projects, ensuring comprehensive test coverage and alignment with business and technical requirements.
- Performed detailed requirement analysis to identify business scenarios, dependencies, risks, edge cases, and potential coverage gaps.
- Designed, reviewed, and maintained test strategies, test plans, test cases, and test scenarios for complex business workflows.
- Performed functional, regression, smoke, sanity, exploratory, UI, API, security, and end-to-end testing across Dev, Stage, and Production environments.
- Conducted API testing using Postman and Swagger, validating requests, responses, status codes, data integrity, validations, and error handling.
- Performed security testing using Burp Suite to identify potential vulnerabilities, authorization issues, and input-validation weaknesses.
- Developed and maintained Cypress automation scripts for back-office applications and repetitive business workflows to improve regression coverage and testing efficiency.
- Led defect analysis, root-cause investigation, retesting, verification, and closure in collaboration with Development and Product teams.

- Mentored junior QA engineers, conducted peer reviews, and provided guidance on test design, execution, automation, and QA best practices.

Mid-Level Software QA Engineer

January 2023 – July 2024

- Analyzed business and functional requirements and prepared test scenarios, test cases, and test data covering positive, negative, boundary, and edge-case scenarios.
- Performed functional, regression, smoke, sanity, exploratory, UI, API, and end-to-end testing across multiple environments.
- Tested new features, enhancements, integrations, and complex business workflows to ensure functional and business requirements were met.
- Conducted API testing using Postman and Swagger to validate API functionality, response data, status codes, validations, and error handling.
- Performed security testing using Burp Suite to identify vulnerabilities and input-validation issues.
- Managed defects through GitLab, including bug reporting, prioritization, retesting, regression verification, and closure.
- Collaborated with Product and Development teams to investigate, reproduce, and resolve application issues.
- Participated in sprint planning, daily stand-ups, requirement discussions, release activities, and other Agile/Scrum ceremonies.
- Developed Cypress automation scripts to improve regression coverage and reduce repetitive manual testing.

Associate Software QA Engineer

January 2022 - January 2023

- Reviewed functional requirements and prepared test cases, test scenarios, and test data based on business specifications.
- Performed functional, smoke, sanity, regression, and UI testing for web-based applications.
- Executed positive, negative, boundary, and edge-case scenarios to identify functional and usability issues.
- Reported and tracked defects using GitLab with detailed reproduction steps, expected results, actual results, and supporting evidence.
- Performed API testing using Postman and Swagger to validate basic API functionality, response data, and status codes.
- Participated in requirement discussions, daily stand-ups, sprint activities, QA planning, and release activities.
- Collaborated with developers to reproduce, verify, and close reported defects.
- Built a strong foundation in Agile/Scrum methodologies, software testing processes, test documentation, and defect management.

TECHNICAL SKILLS

Software Testing	Functional, Regression, Smoke, Integration, UAT, Performance, Security Testing
API Testing	REST API Testing, API Validation, Request/Response Testing
Security Testing	Vulnerability Identification
Testing Tools	Postman, Swagger, Burp Suite, JMeter
Test Management	Test Planning, Test Strategy, Test Case Design, Test Execution, Requirement Analysis
Defect Management	Bug Tracking, Defect Reporting, Root Cause Analysis, Issue Management
Project Coordination	Agile, Scrum, Sprint Planning, Backlog Grooming, Release Management
QA Leadership	Test Case Review, Mentoring & Coaching, Process Improvement, Quality Standards
Tools & Platforms	Git, GitLab, AWS, CI/CD, Figma, InVision, Slack, Google workspace
Soft Skills	Problem Solving, Communication, Team Collaboration, Mentoring

PROJECTS

My Second Teacher (MST), Digital Learning Platform

Sr. QA Engineer / Project Coordinator

- Led QA across MST and regional platforms for Nepal, Indonesia, Alston, and Global markets, ensuring quality and consistency across localized product environments.
- Led comprehensive validation of core functionality across student, teacher, school, classroom, learning resource, and content workflows, including platform integrations and region-specific functionality.
- Led release validation and production readiness across multiple product environments, working closely with Product, Development, and other stakeholders to identify, troubleshoot, and resolve functional and production issues.

My Second Teacher Backoffice (MST BO), Digital Learning & School Management Platform

Sr. QA Engineer / Project Coordinator

- Led requirement discussions, project planning, task coordination, and delivery tracking across Design, Development and QA teams.
- Performed end-to-end functional, regression, smoke, API, security, and UI testing across school, class, users, content, resource, and reporting modules. And automated repetitive back-office workflows using Cypress, including critical CRUD and business workflows.

Human Resource Management (HRM), Work-Related Learning (WRL)

Project Manager / Key Stakeholder

- Managed the end-to-end project lifecycle, including project planning, requirement management, execution, monitoring, and delivery.
- Acted as a key stakeholder and point of contact, representing business requirements and ensuring alignment between project objectives and implementation.
- Coordinated with Dev, QA, and other stakeholders to manage priorities, dependencies, risks, and project blockers while monitoring timelines, deliverables, and milestones to ensure successful and timely project delivery.

Home School Asia (HSA), Online Learning Platform

Sr. QA Engineer

- Designed and executed test scenarios covering core learning, user management, and platform workflows.
- Identified, documented, and verified defects throughout the development and release lifecycle.

Kungfu Quiz (KFQ), Interactive Learning Platform

QA Engineer

- Performed functional, regression, UI, and exploratory testing across KFQ, Sifu, and KA platforms.
- Identified, documented, and verified defects throughout the development and release lifecycle.

EDUCATION

BSc. (Hons) Computing, Islington College, London Metropolitan University
Kamalpokhari, Kathmandu

2020

+2 HSEB (Management), Trinity International College
Dillibazar, Kathmandu

2017
